

# Kaneka Q30™

Microencapsulated Kaneka Ubiquinol® Powder

## Features & Benefits

**Kaneka Q30™ is a 30% Ubiquinol powder offering all the benefits of Kaneka Ubiquinol® in an air-stable form.**

- Ubiquinol is readily converted to oxidized ubiquinone upon contact with oxygen. To prevent oxidation, it must be protected by a barrier with low oxygen permeability.
- Kaneka worked with a leading pharmaceutical encapsulation company to develop a proprietary stabilization process based on fluid bed drying technology.
- Kaneka Q30™ can be used for capsules, stick packs, nutrition bars, protein shakes, soft chews, and other solid food types.
- A viscosity enhancer like xanthan gum can help keep Kaneka Q30™ suspended for liquid formulations. Kaneka Q30™ can also be dissolved in hot water.

**Kaneka Q30™ is available in powder form as:**

## 30% Kaneka Ubiquinol® by Weight

### Product Applications

- 2-piece hard-shell capsules
- Powdered beverages
- Meal replacements
- Food

### Packaging

1 kg or 5 kg units  
MOQ: 3 kg

## Physical & Chemical Properties

### Concentration

30% concentration

333 mg of Kaneka Q30™ is equivalent to 100 mg of Kaneka Ubiquinol®

### Solubility

Water-dispersible

### Stability

2-year shelf life

### Appearance

White to pale yellow, free-flowing powder

### Particle Size

80-20 mesh (<850 µm)

Kaneka Ubiquinol® was acknowledged by the FDA in 2007 as a New Dietary Ingredient (NDI) for use in dietary supplements and is self-affirmed Generally Recognized as Safe (GRAS) for conventional food uses.

Kaneka Q30™ is manufactured in the USA.

## Ingredient List

- Kaneka Ubiquinol®
- Modified food starch (corn)
- Gum acacia
- Sugar spheres (sucrose, starch)
- Ascorbic acid
- Purified water
- Glycerin
- Silicon dioxide
